2.2. URMĂRIREA EVOLUȚIEI SPAȚIO-TEMPORALE A GRAVITĂȚII

2.2.1. Determinari de gradient vertical

Odata cu construcția noii infrastructuri cibernetice, distribuția maselor în clădirea care adăposteşte clusterul de computere CYBERDYN dar şi laboratorul de gravitate s-a modificat, fapt care a făcut necesară redeterminarea gradientului vertical al gravității în zona pilastrului. S-a lucrat cu două trepiede de înălțimi diferite, repetând determinările în zile diferite.

Datele înregistrate sunt prezentate în continuare.

2.2.2. Legaturi între LG-IGAR si rețelele naționale de gravitate

Prezentăm în continuare înregistrările efectuate în cadrul legăturilor gravimetrice dintre LG-IGAR şi rețelele naționale de gravitate (stația Buzău din rețeaua națională de referință de ordinul II si stația Surlari (SUA), din rețeaua europeană UNIGRACE.

Ca si în cazul determinărilor de gradient, determinările au fost efectuate în mod repetat în cicluri de măsură din zile diferite.
